OM AUTOTIME PLUS

(WITH HIGH/LOW PROTECTION)

The AUTOTIME DIGITAL PLUS is a smart auto on/off switch with digital timer and high/low voltage protection. It is specially designed to protect costly LED boards and appliances from voltage fluctuations while giving you full control over ON/OFF timing ..

High/Low Voltage Protection –

Cuts off supply when voltage goes above or below set limits (user-programmable)

Up to 12 Programs –

You can set your device to turn ON/OFF from 1 to 12 times in a single day.

Bypass Switch –

Instantly turn ON the device without waiting for the program.

Auto Stop Alert –

A buzzer beeps for 5 seconds whenever the device turns OFF.

Manual Control –

Start or stop anytime with the push button.

Digital Clock Display –

Works as a bright wall clock too.

Battery Backup –

Keeps your time and settings safe during power cuts.

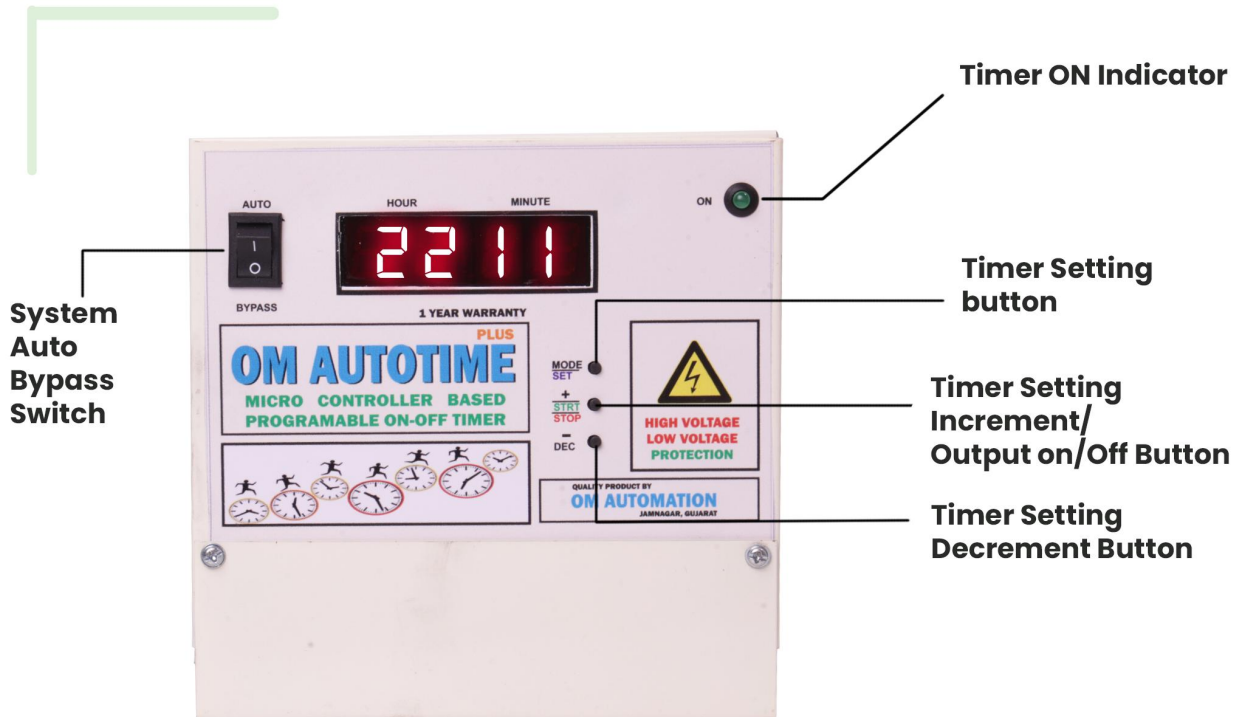

1 Year Warranty

Best Uses:

LED signboards & glow signs
Street lights, parking & porch lights
Water pumps for apartments, houses, and farms
General automation where timing + voltage protection is required

DIGITAL ON/OFF TIMER
