OM TIME PUMP

Looking for a smart way to save electricity without compromising on comfort? The Time pump Cyclic On/Off Timer is a quartz-based intelligent device designed to automatically switch your AC, ceiling fan, or water pump in a cyclic sequence. It helps you enjoy cooling at night without frequent manual switching while significantly reducing power consumption ..

1 Year Warranty**Why Choose Time Pump Cyclic On/Off Timer?****Energy Savings –**

A 1.5 Ton AC consumes approx. 2 units/hour. By running in cyclic mode with fan operation during AC-off periods, you can save up to 25–30% electricity.

Comfort Assured –

No more waking up at night to turn OFF the AC and turn ON the fan. The timer does it automatically for you, maintaining cooling and airflow seamlessly.

High/Low Voltage Cutoff – Protects your AC, motor, or pump from damage caused by voltage fluctuations.

Delay Start Protection – Built-in 3-minute delay ensures safe compressor restart, preventing overload and enhancing AC life.

Bypass Switch & LED Display –

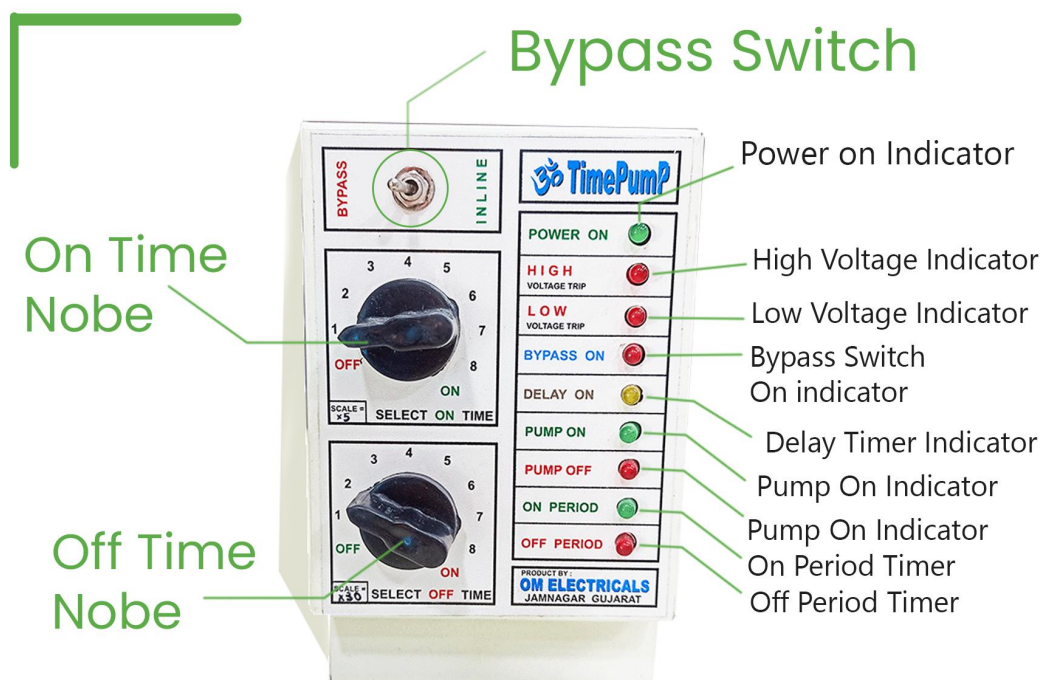

Convenient control with clear LED indications for status and faults.

Cyclic Timer Range (Knob Selection):

ON Time Options: 5, 10, 15, 20, 25, 30, 35, 40 Minutes

OFF Time Options: 30, 60, 90, 120, 150, 180, 210, 240 Minutes

Simple rotary knob adjustment for user-friendly operation

Example Use Case:

If you set ON Time = 20 minutes and OFF Time = 120 minutes, the AC will run for 20 minutes, then switch OFF automatically for 120 minutes (during which the ceiling fan will run to maintain cooling). After this cycle, the AC will restart again and repeat continuously.

Example (Water Pump):

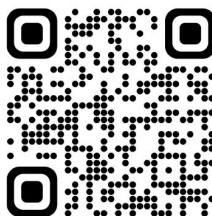

If you set ON Time = 15 minutes and OFF Time = 60 minutes, the water pump will run for 15 minutes, then switch OFF for 60 minutes, and repeat the cycle automatically—perfect for maintaining tank levels or irrigation without manual effort

Smart Comfort
Energy Efficiency
Device Protection
Multi-Application Use

The Time Pump Cyclic On/Off Timer is the perfect solution for homes, offices, server rooms, and commercial setups—giving you comfort, safety, and huge electricity savings in one device

Applications

Deep freezers & water coolers
Water pumps & fogger systems
Greenhouses & poultry farms
ATM centers & server rooms
Sequential operation of two ACs
