OM AUTOPUMP DIGITAL

Our **Om Autopump Digital** water level controller is a smart solution that automates your water pump, enabling it to start and stop according to the tank's empty and full levels. This convenient feature saves you time and effort while ensuring that your tank remains at the desired water level.

In addition to this, the controller comes equipped with several advanced features such as high-low voltage cut-off, overload protection, current-based dry run protection, auto start function, delay start timer, auto-stop siren, and run time over timer.

Fully Automatic Water Level Control –

Starts and stops pump automatically as per tank level.

Advanced Magnet Sensor Technology –

Shock-proof, rust-free, no salt deposition.

High / Low Voltage Protection –

Cuts off supply if voltage goes beyond safe limits (programmable by user).

Overload Protection –

Prevents pump from burning due to excessive load.

Current-Based Dry Run Protection –

Stops pump if running without water, avoiding motor damage.

Delay Start Timer (10 Seconds) –

Protects motor during frequent voltage fluctuations.

Auto / Manual Mode –

Choose automatic operation or manual control via push buttons.

Run Time Over Timer –

Shuts off pump if it runs longer than programmed time, even in sensor failure.

Auto Stop Siren –

Alerts with a short buzzer sound in case of fault.

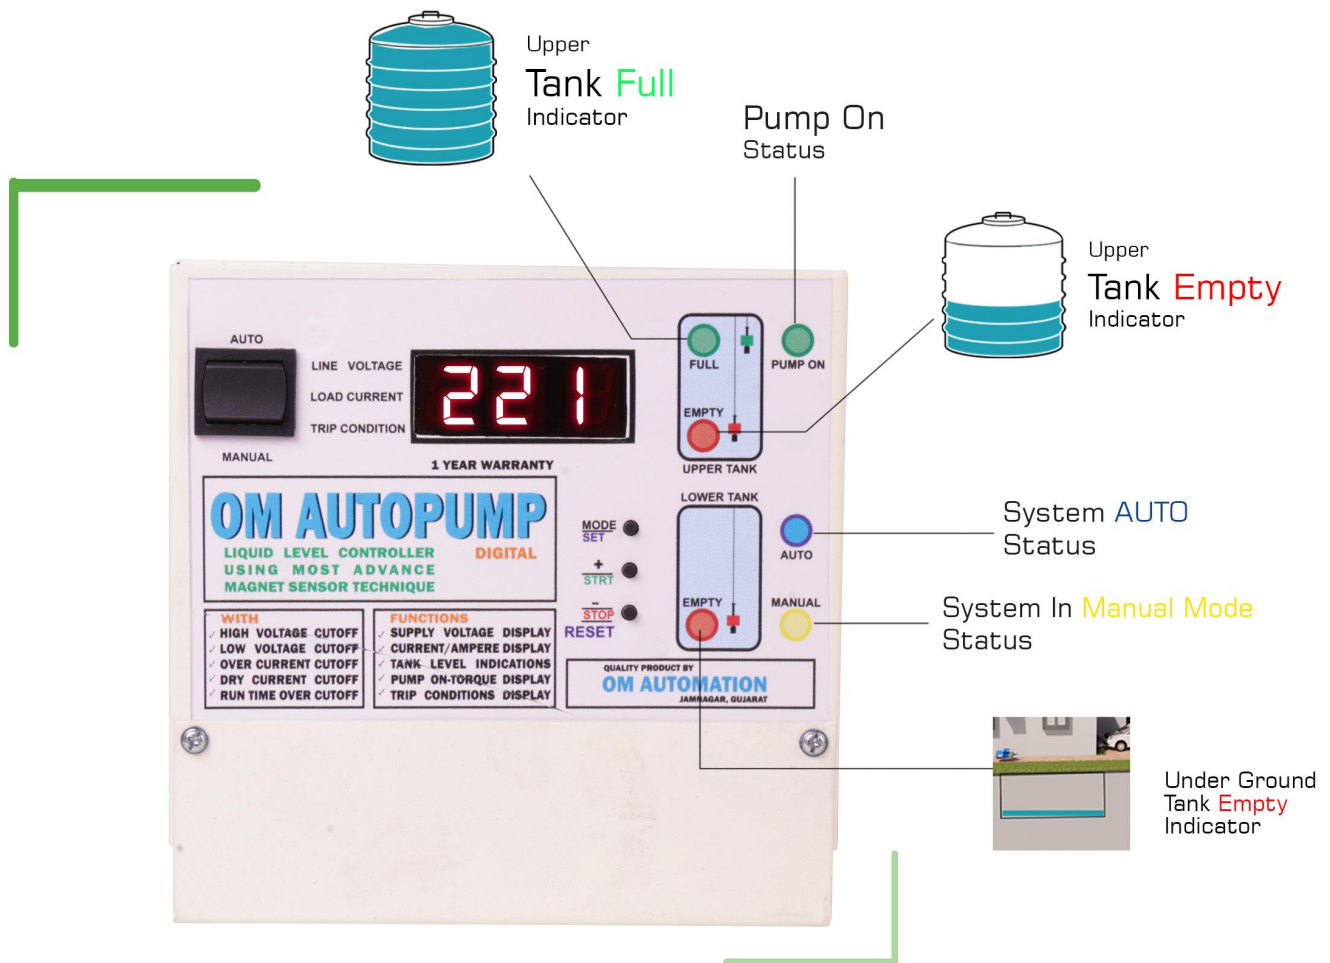

1 Year Warranty
