Say Goodbye to Scale

SUPERSOFT

Say goodbye to limescale problems with Supersoft Water Softener for Home. This advanced, salt-free and chemical-free water conditioner uses electronic impulse technology to prevent scaling, protect your pipes and appliances, and keep your water natural and healthy – without changing its taste or mineral content.

Benefits & Advantages of Supersoft

- ✓ Simple Installation
- ✓ No need for regular service.
- ✓ Minimal ongoing expenses.
- ✓ Improves efficiency of appliances
- ✓ No Chemical Removers
- ✓ Drinking water quality remains unchanged.
- ✓ Preserves precious mineral substances in water.
- ✓ Detergent Savings
- ✓ prevents drying and irritation caused by calcium.
- ✓ Positive effects on certain skin conditions and eczema.

Supersoft is a chemical-free water treatment system that alters the physical characteristics of scale crystals, preventing them from sticking to pipes.

Technical Details & Models

How Supersoft Works – Descaling Effects

Stops Scaling on Surfaces:

Supersoft modifies calcium crystallization. Scale loses stickiness and flows away as fine powder.

Removes Old Scale:

Through natural carbonic acid process, old scale deposits are dissolved safely.

Protects Against Corrosion & Rust:

Electrophoresis process forms a protective layer of metal carbonate inside pipes.

Reduces Bacterial Contamination:

Since scale is removed, bacteria no longer have a breeding ground.
