OM AQUA CYCLE

Is your underground water supply getting weaker? Does your submersible pump often fail to fetch enough water? The Om Aqua Cycle Digital – Water Pump Timer Switch is the perfect solution to ensure efficient and reliable water pumping, even in low water conditions.

- Digital ON/OFF programmable cyclic timer
- Magnet-based tank full sensor
- Water fetching sensor for dry run protection
- User-friendly design, easy to install and operate
- Increases pump life & ensures steady water supply

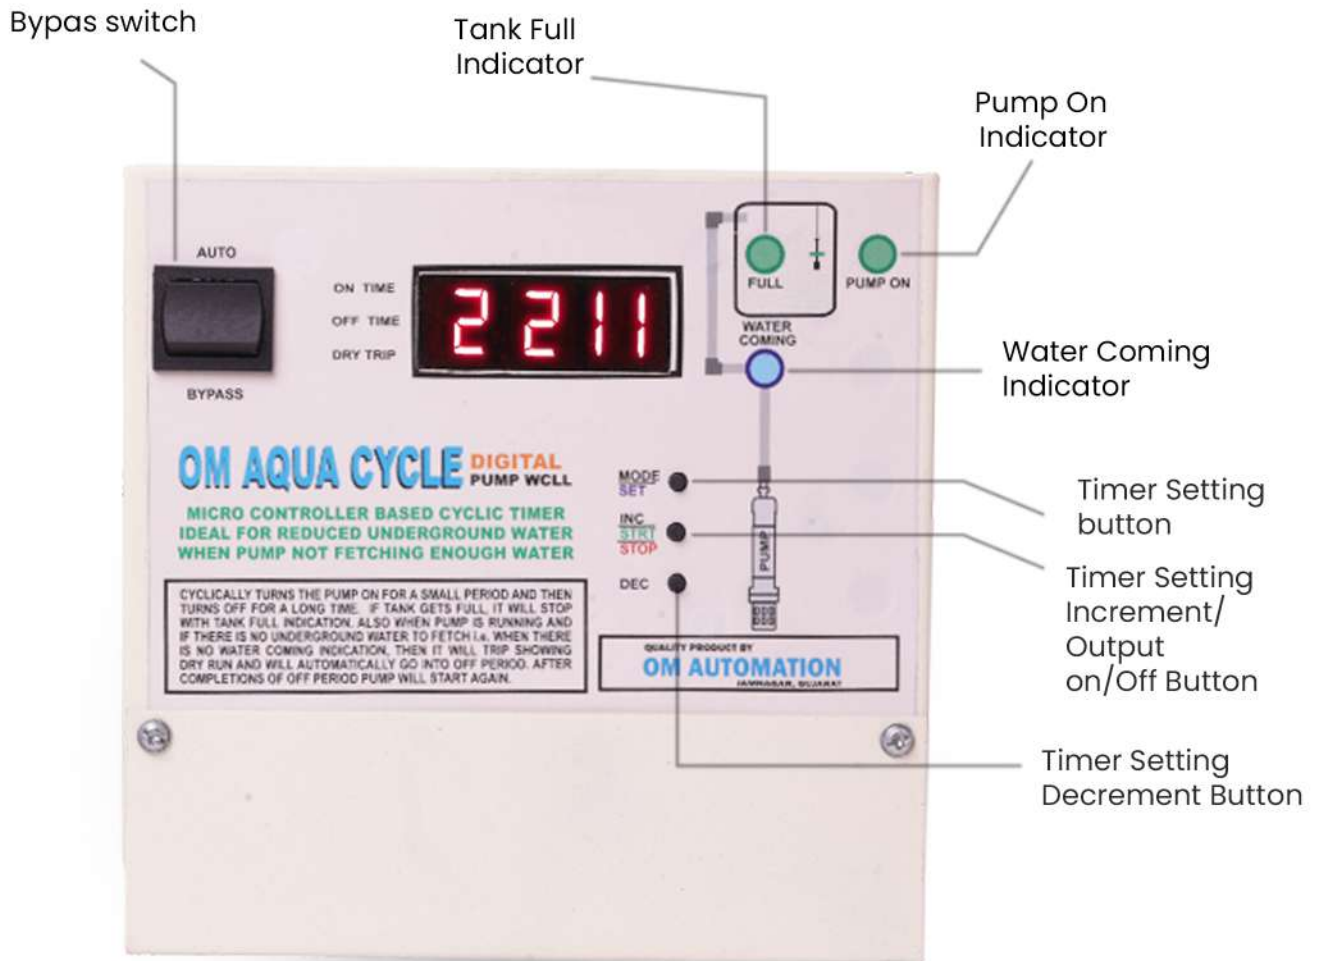

The Om Aqua Cycle Digital – Water Pump Timer Switch is the smartest way to manage your water pumping system. It keeps your motor safe, saves electricity, and ensures you always have enough water without wastage.

Cyclic Pumping System
Fully Programmable Timer
Tank Full Protection
Dry Run Protection
Energy & Water Saving
